

Coveros Signs Exclusive Partnership Agreement With SQE Training

Coveros, Inc. to Provide Software Quality Consulting to SQE Training Clients

Herndon, Va., January 15, 2009 — Coveros, Inc., a company that helps organizations accelerate the delivery of secure, reliable software, today announced a strategic partnership with SQE Training of Jacksonville, FL.

Under the terms of the Partnership, Coveros will be SQE Training's exclusive consulting partner for software quality services; providing test process improvement, agile software testing, test automation, and software process improvement to SQE Training clients associated with the over 20,000 technical personnel SQE has trained.

"We are excited to work closely with SQE Training to help their clients deliver secure, reliable software," says Jeffery Payne, Coveros CEO. "We believe coupling world-class software training with practical consulting support significantly improves any organization's software business value."

"SQE Training works to provide our customers with the best possible software quality solutions," says Alison Wade, SQE Training CEO. "Coveros has demonstrated the ability to improve our clients' software and we believe that strengthening our business relationships will lead to greater customer satisfaction."

About Coveros

Coveros helps organizations accelerate the delivery of secure, reliable software. We use agile methods and software assurance best practices to deliver mission-critical software on-time and budget. Coveros provides a wide range of software consulting services that include: software process improvement, agile software development, agile testing & automation, and application security.

About SQE Training

Software Quality Engineering delivers training, support, research, and publications to software managers, developers, test professionals, and quality engineers worldwide. Since 1986, we have been at the forefront of software quality improvement technology and were instrumental in setting the stage for the software industry to view testing as a distinct discipline. Today, Software Quality Engineering produces several of the most respected conferences in the software testing industry and provides testing and development training for more than half of the Fortune 1000. We also produce two highly rated publications —Better Software magazine and StickyMinds.com.
